

RIT myCourses

Jaymee Rosser

Project Statement:

How can myCourses be designed to fit the needs of the students and still effectively communicate the overall goal and intentions of the site?

Jaymee Rosser

Project Solution: Create a design that is Quick, Efficient, and Reliable.

RIT myCourses

Jaymee Rosser

Solution Summary: Limit the number of pages of the site and the overall number of times the user has in click the mouse or tap the screen.

Create a design that will allow the professor to edit and make changes to class content.

User Workflow:

RIT myCourses

Jaymee Rosser

Hi-Fi Wireframe:

- ① Easy to find Search Bar.
- ② RIT events as the header to let the users know what's going on around campus.
- ③ Interactive calendar that allows user to add due dates and link to google calendar.
- ④ Notifications and Course updates upfront to notify the user what's going on with their academics
- ⑤ News panel gives users access to what's going on behind the scenes with myCourses and updates on the site.

RIT myCourses

Home Page

The RIT myCourses Home Page features a prominent banner for a faculty-led study abroad program in Rwanda. Below the banner is a calendar for March 2016, showing various assignments and events. A news section discusses a login issue, and a 'Program Requirements' section outlines the NMDE-BFA plan. At the bottom, there are social media sharing icons and a footer with support links.

Course Page 1/2

This course page displays a video of Tony Fadell speaking at a TEDx event. It includes a calendar for March 2016, a list of updates, and a 'Content - Dropbox - Email' section. The page also features a 'Drop & Drop' area for file uploads and a 'Submitted Files' section.

Course Page 2/2

The second part of the course page shows student grades, a detailed course description, and a 'Discussion Posts' section with recent activity. It also includes an 'Academic Integrity' section with information about the policy and early alert system.

Project Summary:

The design resulted in pages that contained much of the content that was specific to the purpose of the page.

Providing the user with all of the major content on page allows for quick and efficient access that will satisfy their needs

The visual design of the course page makes it so the professor view is highly adaptable without many changes to the interface.
